

Equal Opportunities Statement

Rawcliffe Bridge Primary School is committed to providing an environment which is conducive to learning and where everyone can develop skills and attitudes for life.

Each person is valued and respected regardless of ability, race, gender, religion, social background, culture or disability and is offered opportunities to develop their full potential; the means to develop physically, intellectually, emotionally and socially and the opportunity to develop good citizenship skills and responsible attitudes for life.

The school family ensures its approach to everyone is non-discriminatory, that all groups have equal access to the full range of educational opportunities provided by the school, local authority or wider community and that diversity is celebrated.

The school equally values the contribution made by all stakeholders and does not discriminate against anyone on the grounds of their racial or ethnic origin, gender, religious beliefs or, where practicable, disabilities. This extends to the recruitment of staff and to the admission of pupils.

As laid out in its Disability Equality Scheme, the school makes every effort to ensure that no child, parent/carer, member of staff, governor or other stakeholder is disadvantaged as a result of their disability.

Each school curriculum policy lays out how equality permeates throughout the whole curriculum and is reflected in the ethos of the school.

The adults set good examples, so that children can see everyone in the school being treated with respect and fairness regardless of their gender, age, religion or race. All people in the school have equal access to all curriculum opportunities offered by the school.
